

3. Cloud Solutions Architect

Role Title: Cloud Solutions Architect

Path and Level: P2

Location:

Team: Cloud Services

Supervisor: Director, Cloud Engineering

Position Description:

Seeking a highly skilled Cloud Architect to design and manage scalable cloud-based solutions across AWS, Azure, and GCP. You will work closely with development and DevOps teams to ensure optimal cloud adoption.

Responsibilities:

- **Design cloud architecture frameworks and best practices.**
- **Lead cloud migration and modernization projects.**
- **Implement security controls, cost optimization, and cloud governance.**
- **Develop automation scripts for cloud resource provisioning (Terraform, ARM Templates).**
- **Support hybrid cloud deployments and multi-cloud strategies.**

Qualifications:

- **Bachelor's Degree in Computer Science, Engineering, or equivalent.**
- **4+ years of hands-on cloud architecture experience.**
- **Expertise in AWS, Azure, and/or GCP services.**
- **Solid understanding of networking, storage, and security on cloud platforms.**

Preferred Skills:

- **Certifications (AWS Solutions Architect, Azure Solutions Architect).**
- **Familiarity with container orchestration (Kubernetes).**
